Solutions

First impressions count!

Your driveway creates an instant impression about the quality of your home and your sense of style. An attractive driveway adds lasting value to your property investment, but making the right choice in driveway finishes can be confusing.

One of the easiest and most cost-effective ways to improve the appearance of an existing driveway, or put that professional finishing touch to a new one, is the application of a decorative stencil coating. Patterns come in all shapes, sizes, styles and finishes and can be customised to suit your personal style with a huge range of complimentary colouring and edge finishes.

Stencilshield is the new-generation coating system that's not just ideal for driveways: it's the first choice for outdoor areas from paths and entertaining areas, to poolside courtyards and gazebos.

This innovative product is the safe and stylish finish for all outdoor applications thanks to its superior anti-slip properties and unbeatable fade resistance. And, because it's manufactured right here in Australia, it will stand up to even the harshest weather conditions for long-life durability. Another feature of our product is the water-based clear topcoat, meaning no toxic smell, ease of use and no mess water clean up.

With *Stencilshield*, you can say goodbye to the hassle of mixing oxides, hardeners and concrete on-site! *Stencilshield* is a revolutionary water-based solution that guarantees unrivalled flexibility and high resistance to cracking.

Based on 100% acrylic resin, *Stencilshield* delivers strong, durable colours largely unaffected by fading because the colour is locked in with the resin (rather than the traditional oxide additives).

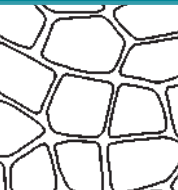

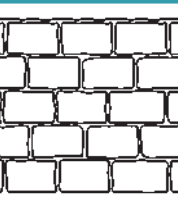

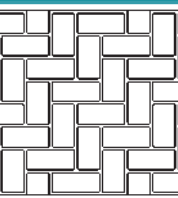

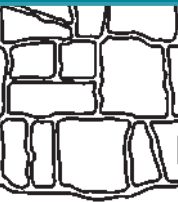

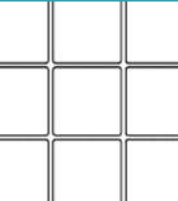

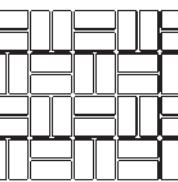

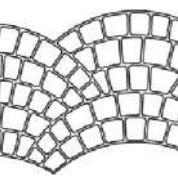

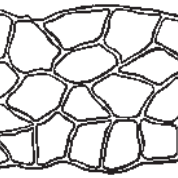

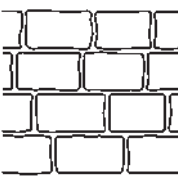

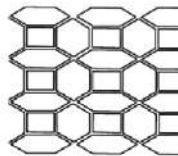

Better still, *Stencilshield* comes pre-mixed and ready to apply straight from the bucket – that means more accurate colours, less mess and a professional, stylish finish every time.

Add value to your home

Huge range of stylish colours

Quick drying and durable

Fade resistant ...
crack resistant ...
slip resistant!

Advantages

- Increased slip resistance
- Superior colour fade technology
- Large range of colours
- High crack resistance due to its flexibility
- Adds value to your property
- Resistant to water whitening (blanching)
- Fast hardness development ensuring quick drying time
- Highly durable
- Domestic and commercial applications

THE IDEAL CHOICE

Because it is an acrylic based coating system, *Stencilshield* has greater flexibility and resistance to cracking compared with traditional cement-based coatings. *Stencilshield* is the ideal coating for new or existing broom finished or exposed aggregate concrete and can also be applied to asphalt or bitumen driveways and paths.

With the added advantage of fade-resistance and anti-slip technology, *Stencilshield* is the ideal choice for safety, longevity, colour fastness and looks. Available in a wide range of fashion colours, finishes, patterns, styles and edging, *Stencilshield* offers the creative, affordable solution to all your outdoor finishes.

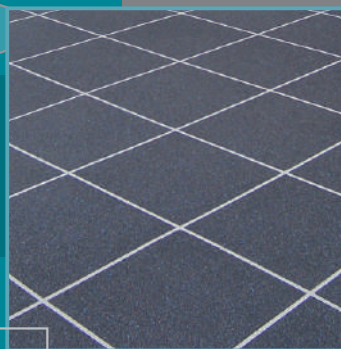

Stencils, colours and styles are only a small sample of our product range, to view the full range, please go to our website at www.shieldcoat.com

As the water based alternative to oxide additives, *Stencilshield* is also the environmentally friendly choice in finishes.
